SUMMARY

Full stack web developer with a background in management, leading teams to share a “one team, one goal” mentality while maintaining a keen attention to detail and accuracy. Recently earned a certificate in full stack development from the University of Oregon, with newly developed skills in JavaScript, CSS, React.js, and responsive web design. Recognized for maintaining a reputation of being calm under pressure and a fast learner. Excited to learn and further develop skills in the future as part of a fast-paced, quality-driven team.

TECHNICAL SKILLS

HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, Algorithms and Data Structures, MongoDB, MySQL, Command Line, Git, Java

PROJECTS

Otaku Zone | <https://github.com/tristinbarnett/Project1> | <https://tristinbarnett.github.io/Project1/>

- An app that caters to the niche market of Anime fans. Allows users to search for an Anime by title and receives details about that Anime including if there is a Manga, and a list of recommendations based on viewers.
- My responsibilities in this group project was to create UI and assist with AJAX calls
- HTML/CSS, JS, API

Weather Dashboard | <https://github.com/tristinbarnett/Weather-Dashboard> | <https://tristinbarnett.github.io/Weather-Dashboard/>

- This Project was to create a dashboard that would allow the user to search by city name and utilizing weather API would populate the page with the weather forecast for that city.
- HTML/CSS, jQuery, API

Workday Scheduler | <https://github.com/tristinbarnett/workdayscheduler> | <https://tristinbarnett.github.io/workdayscheduler/>

- Application where you can input schedule and it saves to local storage so that when you refresh, your input stays. Also color codes times if they are past, current or future.
- HTML/CSS, JS, jQuery, local storage
